2000R INSTALLATION GUIDELINE

COMPONENTS

INSTALLATION GUIDELINE

- 1 Slide 41B36 sprocket on door shaft
- 2 Fix chain hoist on wall (fastener not included)
- 3 Wrap roller chain around door and hoist sprockets and secure with connecting link provided
- 4 Tighten roller chain by sliding chain hoist
- 5 Insert hand chain in chain hoist, then adjust the hand chain length if necessary, and close the open link (see page 2)
- 6 Insert shaft key in door sprocket and door shaft
- 7 Align door sprocket and chain hoist sprocket
- 8 Insert set screws in door sprocket and tighten

DISCLAIMER: Door manufacturer's installation instructions supersede these instructions.

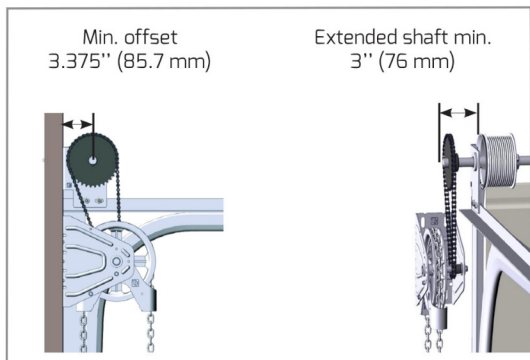

V01.22

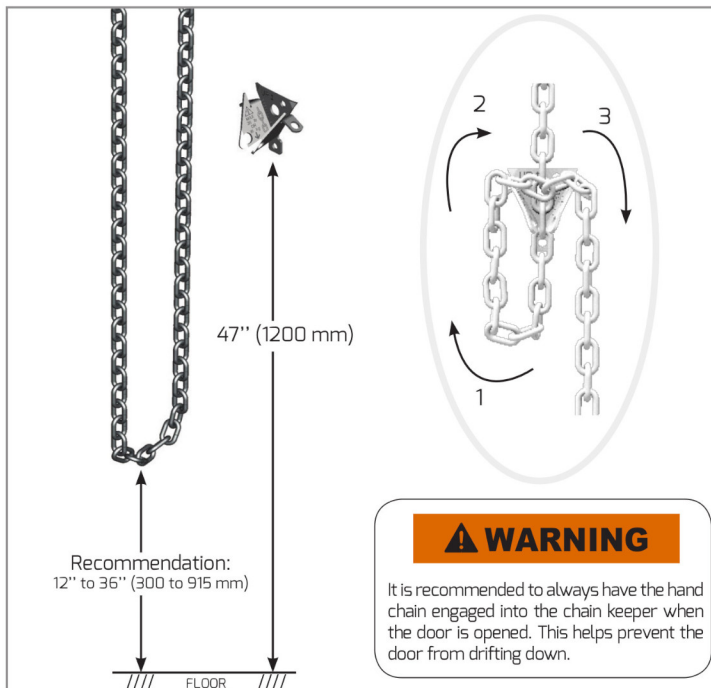

CAUTION

Do not use chain hoist to wind the door's spring. For standard lift or low headroom application, it is preferable to use pusher springs to prevent cable jumping out of the drum. Use on counterbalanced sectional door only.

» CHAIN HOISTS (APARATO DE CADENA) MARCA CANIMEX MOD.2000R SERIE 126654.

Chain hoist may be mounted on either side of the door

⚠ WARNING
 It is recommended to always have the hand chain engaged into the chain keeper when the door is opened. This helps prevent the door from drifting down.

OPTIONAL

HAND CHAIN TENSIONER

Add the hand chain tensioner for a better control of chain movements.
